PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science student with a strong foundation in Data Structures, Algorithms, and Web Development. Skilled in Python, machine learning, computer vision, and full-stack development. Passionate about building impactful AI-powered solutions and continuously upskilling through certifications and hackathons.

EDUCATION

Bachelor of Technology in Computer Engineering

Jyothi Engineering College, Cheruthuruthy | 2023 – Present

GPA: 7.21 / 10

Class XII

IHRD Technical School, Angadipuram

Percentage: 96%

SKILLS

Frontend & Design: HTML5/CSS3, React.js, Next.js, Tailwind CSS, Streamlit, Figma

Backend & Logic: Python, FastAPI, Flask, REST APIs, JWT Auth

Core AI & ML: PyTorch, TensorFlow, Computer Vision, ResNet

AI Agents & Tools: Gemini, Claude, ChatGPT, Cursor, Codex, Lovable

Data Architecture: PostgreSQL, Supabase, MS SQL Server, Firebase

Cloud & Deploy: AWS, Vercel, Netlify, Railway, Render, Hostinger

PROJECTS

NeuroDocX – AI Doctor for Brain Disorders

| Python, ResNet, Grad-CAM, Gradio

- Built an AI system to detect Alzheimer's and Brain Tumors from MRI images.
- Used ResNet and Grad-CAM for explainable AI.
- Integrated Gradio for interactive diagnosis.

AI Prescription Analyser

| Python, OCR, NLP, Gemini API

- Analyzes prescription images to extract medicines and detect potential issues.
- Uses OCR for text extraction and NLP for medicine verification and interaction.
- Provides AI-based recommendations and alerts.

Art Gallery Web Application

| HTML, CSS, JavaScript, Flask, SQLite

- Developed a platform to upload, browse and manage digital artworks.
- Features include user authentication, artwork categories and search.
- Responsive UI with a clean and modern design.

Event Management Portal

| Flask, HTML, CSS, JavaScript, SQLite

- Full-stack web portal to create, manage and register for events.
- Includes user roles, event analytics, ticket management and notifications.
- Streamlines event operations for organizers and attendees.

Face Blurry App

| Python, OpenCV, Streamlit

- Detects and blurs faces in images to protect identity.
- Useful for privacy protection in photos and videos.
- Provides simple UI for easy upload and processing.

CERTIFICATIONS

Industry-led AI Certificate – IPSR Solutions Ltd | Software Product Management – Skillssoft |

Web Development Certification – Elewayte | Power BI Certification – Elewayte | Introduction to Data Science – Cisco |

Introduction to Modern AI – Cisco | Introduction to Cybersecurity – Cisco | NPTEL Certification – Introduction to Operating Systems

WORKSHOPS & ACHIEVEMENTS

- Electric Vehicle Workshop – EVOLVE
- Design Thinking Workshop – IEDC
- Workshop: Game Development
- Social Media Challenge 2024 – E-Cell
- NASA Space Apps Challenge – Hackathon Participant
